PROFESSIONAL SUMMARY

Aspiring Python Developer with a Computer Science degree and hands-on project experience in Django/Flask, REST APIs, and SQL/NoSQL databases. Known for writing clean, well-structured code and quickly picking up new tools and frameworks. Ready to bring strong fundamentals and a proactive mindset to a development team.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS

Python Ecosystem: Django, Flask, REST APIs

Databases: MySQL, Oracle, PostgreSQL

Tools & Version Control: Git, GitHub, VS Code, Postman

Concepts: OOP, Debugging

Other: Basic Linux/Bash, Excel, PowerPoint

WORK EXPERIENCE

Web Developer Intern

8queens Technologies, Chennai

- Gained hands-on experience in front-end web technologies including HTML, CSS, and JavaScript, focusing on both design and functionality of websites.
- Developed and styled multiple static web pages using HTML and CSS, improving understanding of web structure and responsive layouts.
- Practiced basic JavaScript programming to add interactivity and enhance user experience on web pages.
- Strengthened problem-solving and project implementation skills through structured tasks and real-time project exercises.

PROJECTS

AI-Based Plant Disease Detection with Treatment Recommendation

- Developed an AI-powered system utilizing MobileNetV2 (CNN) and TensorFlow/Keras to detect crop diseases with 94.5% accuracy.
- Built a web-based client using Streamlit and a Python Flask API to allow real-time image uploads and diagnostic analysis.
- Integrated MongoDB to store crop data and dynamically recommended chemical and organic treatments for identified plant diseases.
- Implemented multi-language translation and web-scraping to deliver localized diagnostic summaries to agricultural workers.

AI-Powered Customer Service Chatbot

- Developed a real-time conversational AI chatbot using Flask (Python) and JavaScript, integrating OpenRouter and DeepSeek API engines.
- Built a dynamic API routing controller that handles multi-model selection and seamlessly switches endpoints, request headers, and authentication keys based on user selection.
- Designed a modern, responsive web UI, custom CSS animations, client-side session storage (LocalStorage) for persistent chat history
- Robust Error Handling: Engineered advanced backend error interceptors in chat to gracefully handle API limits (HTTP 429), billing alerts (HTTP 402), and connectivity issues, improving frontend user experience.

Currency Converter System

- Built a Python-based tool for multi-currency conversion using real-time and historical exchange-rate APIs.
- Implemented data visualization for currency trend analysis and optimized API calls for performance.

EDUCATION

Anna University, Arni — B.E., Computer Science and Engineering [2022-2026]

- **Relevant courses:** Problem Solving and Python Programming, Database Management Systems, Web Technologies

CERTIFICATIONS

Introduction to Generative AI — Google Cloud (Jul 2025)

- Understood the core concepts of generative AI, including large language models (LLMs), diffusion models, and responsible AI principles.
- Explored practical applications of generative AI in text, image, and content creation, enhancing knowledge of modern AI technologies.
