PROFESSIONAL SUMMARY

Python Full Stack Developer with 6 months of internship experience building web applications using Python, Django REST Framework, React, and MySQL. Experienced in developing RESTful APIs, implementing CRM modules, designing database models, and integrating third-party APIs. Hands-on project experience in AI-powered applications using Flask, TensorFlow/Keras, and MongoDB. Seeking a Python Developer or Django Developer role focused on backend development and scalable web applications.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript
Python Libraries: Numpy, Pandas
Backend: Django, Django REST Framework, Flask, REST APIs
Frontend: React.js, HTML, CSS
Databases: MySQL, PostgreSQL, Oracle, MongoDB
Tools: Git, GitHub, Postman, VS Code
Concepts: OOP, Authentication, API integration, Exception Handling

EXPERIENCE

Python Full Stack Developer Intern **Apr 2026 – Sep 2026**
BDreamz Global Solutions Pvt. Ltd.

- Developed CRM features using React, Django REST Framework, and MySQL for student and lead management workflows.
- Implemented student registration, profile management, course enrollment, lead tracking, and follow-up functionality.
- Built and integrated RESTful APIs to connect frontend components with backend services.
- Designed database models and relationships for student, course, and lead data.
- Debugged application issues, tested APIs using Postman, and collaborated with the development team to deliver new features.

PROJECTS

AI-Based Plant Disease Detection with Treatment Recommendation

- Solves the problem of identifying crop diseases and finding suitable treatments by analyzing uploaded plant images and providing chemical and organic treatment recommendations.
- Used Python, TensorFlow/Keras, and MobileNetV2 (CNN) to develop the disease detection model, achieving 94.5 accuracy, with Streamlit and Flask for the user interface and backend API.
- Integrated MongoDB for storing crop data and implemented web scraping and multi-language translation to provide localized diagnostic summaries and treatment information for agricultural workers.

AI-Powered Customer Service Chatbot

- Solves the problem of handling customer queries by providing real-time conversational responses through an AI-powered chatbot.
- Used Python and Flask to develop the backend and integrated OpenRouter and DeepSeek APIs to connect with AI models and support multiple model selections.
- Implemented dynamic API routing, authentication handling, and error handling for HTTP 429 and 402 responses, along with CSS animations and JavaScript LocalStorage for chat history management.

Currency Converter System

- Solves the problem of converting currencies and tracking exchange-rate changes by providing conversions using real-time and historical exchange-rate data.
- Used Python and exchange-rate APIs to retrieve currency information and perform multi-currency conversions based on available exchange rates.
- Implemented currency-trend visualizations using historical data and optimized API calls to improve performance and support exchange-rate analysis.

EDUCATION

Anna University, Arni — B.E., Computer Science and Engineering 2022–2026

CERTIFICATIONS

- **Python Full Stack** - Besant Technologies
- **Introduction to Generative AI** - Google Cloud
